

TARGET ZERO!

“**TARGET ZERO**” is Pyramid Corporation’s long-standing, corporate wide safety initiative. Our Corporate Safety Goal is to achieve and maintain “**Target Zero - Accident & Incident Free Operations.**” It is our genuine commitment to provide our employees and clients the safest work environments possible. As foundation for this commitment we strongly believe in the philosophy that NO accident or injury can be considered acceptable regardless of how insignificant it may seem.

Pyramid has been an active participant in the **CERTIFICATE OF RECOGNITION** Program (C.O.R.) as administered through the Alberta Construction Safety Association (ACSA) since 1995. As an active program member, our Health, Safety and Environmental Program is audited on an annual basis, with external audits conducted every 3 years as per C.O.R. Program Protocols.

Our HSE Program Policies, Rules, Regulations and Standards are consistently applied corporate wide throughout our operations, regardless of work location. Reference is given to local applicable Work Place Health and Safety Regulations to ensure Regulatory compliance is maintained at all times.

In striving to achieve our goal, we are focused on the pro-active continuous improvement of our HSE Program and Processes. A variety of in-house developed systems such as our Hazard Classification System, associated Task Hazard Review and J.H.A. Systems, our behaviour based safety “Target Cards”, continual worker training as well as our innovative fleet management system are all key components in our concerted efforts towards safety success.

We sincerely believe our goal of “accident free operations” is realistic and attainable.

No job is so important that it can’t be done safely!
